# Express Invoice

Professional Invoicing Software

Easily create and manage invoices and track payments.

- ▶ Easily create invoices, quotes and orders
- ▶ Web access mode for remote access
- ▶ Supports multiple users and businesses

Manage customer billing and track payments easily from anywhere. Web access mode enables invoice generation while on the road, from another computer, or a portable device such as an iPhone.

Features

- ▶ Automate recurring invoices
- ▶ Email or fax invoices directly from the application
- ▶ Save or send invoices as PDF files
- ▶ Run multiple businesses from within the same program
- ▶ Automatically send statements to customers with overdue payments
- ▶ Supports multiple users with web access mode
- ▶ Web interface allows other users within the organization to access data and create invoices
- ▶ Web interface enables connections from mobile devices including iPhones
- ▶ Generate reports for accounting, by salesperson, unpaid invoices and more
- ▶ Configure the layout of invoices including the invoice title, alignment, font size, foot comment and logo

Retail Position

- ▶ Available for both Mac and Windows platforms
- ▶ Both English and Spanish versions included on CD
- ▶ There is a customer perception that traditional accounting packages are too complex for invoicing
- ▶ Supports multiple users and multiple businesses from a single installation
- ▶ Web interface allows information networking and mobile access to the application

Product Differentiation

- ▶ Only product of its type for Mac
- ▶ Much easier than a complete accounting package
- ▶ Web interface allows mobile access
- ▶ Supports multiple users
- ▶ Supports multiple businesses
- ▶ Networking allows users access to the same data

System Requirements

- ▶ Windows XP/Vista/7/8
- ▶ Mac OS X 10.3 or later
